

QNH Budget Management System

User Guide & Functional Documentation

Version 1.0

1. Introduction

Purpose

The QNH Budget Management System is the official platform used to plan, approve, monitor, and control departmental budgets throughout the financial year.

The system provides a complete budgeting lifecycle from annual planning through approval, spending control, transfer management, purchase order tracking, reporting, and financial year closure.

The system integrates with CareWare while maintaining independent budget governance and approval workflows.

2. System Features

The system provides the following capabilities.

Financial Year Management

- Open Financial Year
 - Manage Financial Year Statuses
 - PRE_CLOSING Workflow
 - Financial Year Closing
 - Historical Financial Year Access
 - Financial Year Reporting
-

Budget Management

Budget Creation

Departments can create budgets using:

- Manual Entry
 - Excel Import
 - Copy From Previous Budget
 - Copy From Previous Financial Year
 - Copy From Historical Budget Versions
-

Budget Editing

- Create Draft Budgets
 - Save Drafts
 - Edit Draft Budgets
 - Edit Returned Budgets
 - Budget Version History
 - Budget Change Tracking
-

Budget Submission

- Submit Budget For Approval
 - Resubmit Returned Budget
 - View Submission History
 - View Approval Status
-

Budget Approval Workflow

- Budget Review
 - Budget Approval
 - Budget Return
 - General Approval Notes
 - Item Specific Approval Notes
 - General Return Notes
 - Item Specific Return Notes
-

Budget Distribution Planning

Each budget item supports:

- Annual Distribution
- Monthly Distribution
- Quarterly Distribution
- Custom Monthly Distribution
- Custom Quarterly Distribution

Distribution planning allows departments to forecast expected spending throughout the year.

Budget Monitoring

The system automatically tracks:

- Approved Budget Amount
- Planned Quantities
- Purchase Order Consumption
- Transfer Adjustments

- Remaining Balance
 - Remaining Quantity
 - Exceeded Budget Items
 - Department Utilization
-

Purchase Order Linking

The system integrates with CareWare approved Purchase Orders.

Features include:

- Approved PO Retrieval
 - PO Line Selection
 - PO Line Linking
 - Budget Consumption Tracking
 - Duplicate Link Prevention
 - Remaining Balance Updates
 - Over Budget Detection
-

Transfer Management

The system supports:

Existing Item To Existing Item Transfer

Example:

PC Budget → Printer Budget

Existing Item To New Item Transfer

Example:

PC Budget → AI Server

Transfer Methods

- Transfer By Amount
- Transfer By Quantity

Transfer Workflow

- Submit Transfer Request
- Approver Review
- Approve Transfer

- Reject Transfer
 - Balance Recalculation
-

Item & Category Requests

Departments may request:

- New Categories
- New Budget Items
- New Item Types

Workflow:

```
Submit Request
↓
Admin Review
↓
Approve / Reject
↓
Item Available For Budgeting
```

Dashboards

HOD Dashboard

Provides:

- Current Budget Status
 - Budget Summary
 - Remaining Budget
 - Pending Requests
 - Budget Utilization
 - Recent Activities
-

Budget Approver Dashboard

Provides:

- Pending Budgets
 - Pending Transfers
 - Pending Item Requests
 - Approval Workload
 - Financial Year Status
-

Admin Dashboard

Provides:

- User Management
 - Role Management
 - Permission Management
 - Financial Year Management
 - Category Management
 - Item Management
-
